BPIR Declaration

Version: 1

Designated building product: Class 2

Declaration

Code Group Limited Limited trading as SheShed has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product/ System

Name	SheShed Alpine Cabin
Line	The SheShed Alpine cabin is a kitset interlocking timber cabin designed to be used as a garden shed, cabin or sleepout.
Identifier	ALP-U

Description

The SheShed Alpine cabin is a Kitset interlocking timber cabin, designed to be used as a garden shed, cabin or sleepout. The SheShed Alpine Cabin is a single-storey Class 2 detached building that is less than 30m2 in floor area.

When the SheShed is constructed in the backyard of a residential dwelling. If installed not less than 1.0m from a legal boundary and not less than 1.0m from the main residence. Does not contain cooking or sanitary facilities, or a potable water supply. It complies with the 2.3. single storey detached buildings. Plans and specifications associated with the kitsets and prefabs have been signed off by a chartered professional engineer. Subsequently, the work must be carried out in accordance with that design and the SheShed installation guide.

Installation engineering is available for wind zones up to EH (Extra High) as determined by NZS3604:2011. Installation engineering for all Earthquakes zones, 1 through to 4 as per NZS3604:2011. Refer to engineering regarding snow zone are compliance. The Alpine cabin has been designed & complies as IL1 building with 15-year design life. Design standards:

AS/NZS1170 Structural Design Actions NZS3603:1993 Timber Structures Standard NZS3604:2011 Timber Framed Buildings.

- The SheShed Alpine Cabin has been reviewed by Andrew-Melvin-King-Turner Civil and Structural Consulting Engineers to demonstrate compliance with the structural requirements of the New Zealand Building code. Wind zones Low, Medium, High and Extra High as determined by NZS3604:2011.
- Installation engineering for all Earthquakes zones, 1, 2,3 & 4 as per NZS3604:2011.
- Snow zone loading of 2.0kpa roof snow load. Snow zone N0- No altitude limit Maximum altitude, N1- 400m Maximum altitude, N2- 400m Maximum altitude, N3- 400m Maximum altitude, N4- 100m Maximum altitude and N5- 200m Maximum altitude. Confirmed using NZS3604:2011 where it is close to a boundary.
- The Alpine cabin has been designed & complies as IL1 building with 15-year design life. Design standards: AS/NZS1170 Structural Design Actions NZS3603:1993 Timber Structures Standard NZS3604:2011 Timber Framed Buildings.

Maintenance Schedule

To effectively maintain a SheShed Timber cabin in New Zealand we recommend regular cleaning (every 6-12 months) and inspection as per the below schedule.

1. Regular Cleaning:

- Frequency: At least every 6-12 months, or more frequently in coastal or high-risk areas.
- Method: Wash down the exterior with a soft brush and clean water (avoid high-pressure water blasters).
- Detergent: Use a mild detergent to remove dirt, and rinse thoroughly.
- Areas to Pay Attention To: Focus on areas that don't receive regular rain washing.
- Don't: Do not use harsh chemicals or abrasive materials.

2. Regular Inspection and Repair:

- Frequency: Inspect annually, paying particular attention to joints, corners, and the base beams of the cabin.
- Areas to Inspect: Wall board joints, around windows & doors, roof areas, flashings and coatings.
- Inspect all painted, stained, varnished, or sealed timber surfaces at least every twelve (12) months and carry out any repainting, resealing, touch-up coating, or maintenance reasonably required to maintain adequate protection of the timber from moisture, weathering, ultraviolet exposure, deterioration, and normal wear and tear.
- Repair: Address any issues promptly, such as flaking, cracking, or rotting.
- Rot: If you have rotten boards, remove and replace the timber or treat & repair as necessary

3. Recoating:

- Frequency: Re-coat exterior protective finishes as recommended by the paint manufacturer or more regularly if the building is showing signs of wear.
- Preparation: Ensure the surface is clean and dry before applying a new coat of paint.
- Sand Back: Sand back areas of wall boards where flaking or cracking occurs.
- Spot Prime: Putty, sand as appropriate, then spot prime and apply two coats of exterior paint as required.
- Follow Manufacturer's Instructions: Always refer to the paint manufacturer for re-coating requirements.

4. Other Maintenance Tasks:

- Vegetation Control: Prune back vegetation that is close to or touching the cladding.
- Ground Clearance: Maintain the recommended clearance between the bottom edge of the cladding and the finished/unfinished ground.
- Gutter and Downpipe Cleaning: Keep gutters, down pipes and overflow pipes clean to prevent water overflow.

- Maintenance Schedule Document: Have a written maintenance schedule to help track maintenance tasks and ensure consistency.
- Consult Local Experts: For specific advice, consult with a local builder or cladding specialist
